## PROFILE

Software Engineering graduate with experience building Python backends, REST APIs, and AI-powered applications using FastAPI, SQL, and Docker. Contributed to production features at SpeakDuo and built end-to-end AI projects. Seeking a full-time Python Developer role to build reliable backend services and grow in AI engineering.

## SKILLS

- **Front-end:** HTML & CSS **(Tailwind)** • **React** (TypeScript, JavaScript ES6+)
- **Back-end:** Python **(FastAPI, Odoo)** • Java **(Spring Boot)**
- **Database:** MySQL • PostgreSQL • *MongoDB*
- **AI / ML:** Generative AI • LLM Applications • NLP • RAG • LangChain • LiveKit Agents
- **DevOps / Tools:** Docker • Git • GitHub • CI/CD • RunPod

## EXPERIENCE

**SpeakDuo** , **Software Engineer** **07/2026 – Present** | **Remote**

- Developed multilingual AI grammar and pronunciation feedback, lesson generation, and personalized practice for a production language-learning platform.
- Built vocabulary tracking, spaced repetition exercises, and Elo-based CEFR assessment to support adaptive learning.
- Implemented a multilingual LiveKit voice interview agent and optimized speech recognition for real-time captions using voice activity detection.
- Delivered full-stack features for AI chat, personal grammar practice, and synchronized multiplayer learning activities.

**Technologies:** Python, FastAPI, Celery, PostgreSQL, Redis, LiveKit, React, TypeScript, Docker.

**SpeakDuo** , **Software Engineering Intern** **01/2026 – 07/2026** | **Remote**

Developed full-stack features for AI-driven adaptive language learning.

## PROJECTS

**Quranic Shazam** , **Full-stack AI audio recognition system identifying 20 reciters (97.31% top-1 on 781 test clips) and Quranic verses via speech recognition, with live microphone streaming.**

**Tech Stack:** FastAPI, React, TypeScript, ECAPA-TDNN, ONNX Runtime, faster-whisper, Docker.

**Odoo Budget Management with Integrated AI Chatbot** ,
**ERP-based Budget Analytics & Natural Language Financial Assistant**

**Tech Stack:** Odoo 13 (Python), PostgreSQL, XML/QWeb, Gemini API, JS, LangChain, RAG

**Qafiya** , **Full-stack Arabic poetry platform combining meter/rhyme analysis, detailed scansion, ONNX-based diacritization, and AI-assisted poetry generation and revision.**

**Tech Stack:** FastAPI, PyArud, ONNX Runtime, React, TypeScript, Gemini API, Docker.

## EDUCATION

**Higher Institute of Computer Science and Multimedia** , **Software Engineering** **09/2023 – 06/2026** | **Sfax, Tunisia**

**Higher Institute of Computer Science and Multimedia** **09/2021 – 05/2023** | **Sfax, Tunisia**
**Pre-engineering in Computer Science**

## CERTIFICATES

KodeKloud: Python API Development with FastAPI | Scrimba: Learn React |

IBM: Developing Front-End Apps with React

## LANGUAGES

**Arabic** — Native/Bilingual

**English** — Fluent

**French** — Fluent
